

Algorithms and Data Structures
Winter Semester 2015-16

Assignment 4: Shortest path problem

Implement the Dijkstra-Algorithms to find the shortest path in the given Graph.

The result of your program could be shown as Adjacency matrix or adjacency list .
Don't forget

- Compilable source code (gcc or javac)
- No IDEs

Deadline: 25:January 2016,23:59 o'clock.
